

Adversity, Trauma and Resilience

One Adoption West Yorkshire

We pledge to work together with families and colleagues to provide a trauma-informed, multi-disciplinary service that takes a holistic approach to understanding the health, education and social care needs of children and families.

We recognise the impact of trauma for the children and families we work with and seek to acknowledge and respond to this in our work.

Our timely, child-centred, high quality and responsive support will be available from day one throughout childhood into adulthood.

We will work alongside our families to ensure parents have confidence and resilience to support their children to lead more fulfilling lives.

We know we've got it right when families tell us that our services have given them the support they needed and that the quality of life of their family and children has improved.
